

# It's Time for Renewable Energy Solutions!

**Come and hear what is available and happening with real solutions for energy change now.**

The speakers on our Renewable Energy Forum will be:

**Professor Paul Meredith** a QLD Smart State Senior Fellow, Professor of Physics, and Co-director of the Centre for Organic Photonics & Electronics at the University of Queensland will discuss Solar Photovoltaics (Solar PV) for residential and commercial-industrial scale generation, including cost, quality, energy produced and payback.

**Dr. Patrick Glynn** from CSIRO who has spent more than 35 years working in R&D will be speaking on Low Cost Micro Grids and how they can reduce CO2 emissions from power stations by 25%.

**Dr. Philip Machanick** a computer scientist who is now working in a biology lab at UQ but has followed alternative energy developments for some time will chair the panel and present an overview of innovative energy solutions from around the world.

**Wed June 16th 7:30 p.m**  
**The Uniting Church Hall**  
**982 Moggill Rd Kenmore**

Please forward to your networks and friends
